EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan E. Wagner on March 2, 2006.

The application has been amended as follows:

Claims 1 and 13, line 1, the word "essentially" has been deleted.

Claims 1 and 13, line 4, the phrase ",modified phenoxy, or polyester" has been replaced by the phrase - -or modified phenoxy- -.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

A review of applicants' arguments in the pre-appeal brief request filed on September 12, 2005 and a review of the instant amended claims has convinced the examiner that the claims are allowable over the applied prior art of record. The prior art fails to teach or suggest a three layer label stock consisting of (A) a cast face sheet layer, (B) a pressure sensitive adhesive layer in binding contact with the face sheet layer, and (C) a release

liner in contact with the exposed surface of the adhesive layer, wherein the face sheet layer comprises a binder resin matrix of phenoxy or modified phenoxy. Further, the claim language of claim 1 is interpreted by the examiner to have only one layer of component (A). Similarly, claim 13 includes all the features of claim 1 and further includes first electrically conductive particles in layer (A) and second electrically conductive particles in layer (B). Also, no evidentiary support could be provided to support the position that the instant claimed invention would have been obvious to one of ordinary skill in the art.

The closest prior art of AKHTER (5958537) teaches a label structure, including a primer layer located between a polyester or polyimide backing layer and an adhesive layer with conductive particles, wherein the primer layer consists essentially of phenoxy or modified phenoxy binder resin matrix, including conductive particles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 571-272-
